Innova 55 B has the same dimensions as a walk behind model: you can clean faster surfaces up to 3,000/32300 sq. m./ft2.
Comac designed a scrubbing machine that is extremely convenient: indeed, with the same investment intended for a walk behind model is possible to have Innova 55 B, that is more user-friendly and faster in cleaning operations.

Innova 55 B is a ride on scrubbing machine with automatic traction, available in battery version with single disc brush of 56 cm working width.

THE ADVANTAGES OF INNOVA 55

  - It requires little maintenance
  - It is built with top quality materials
  - It uses waste-reducing technologies
  - It scrubs more square metres in the same time
  - It is comfortable, safe and user-friendly
- It is silent: can clean in sensitive environments such as nursing homes, hospitals etc. without disturbing the environment thanks to the "Eco Mode" device, that reduces the sound level
